_____
Kenneth L. Spurlock, Principal

Most Professional Computer Programmer Award

A positive professional attitude can make a huge difference in a learning environment. When a student shows respect for what he does, works hard, and is optimistic about what he is doing it is contagious and refreshing. It brings life to a class and is one of the most fundamental tools a student can use to succeed. Today we would like to recognize a student who comes every day with an attitude like this. He is willing to help his peers in a moment's notice, doesn't get negative when things get hard, acts with dignity, and is willing not only to succeed himself, but help others get there too.

The Most Professional Computer Programmer Award goes to: **Braeden Diaz**
